

Test schedules are derived to maximize personnel time efficiency. Unless otherwise specified, samples should be received by 9:00 AM for minimal time to apply. Test schedules may vary depending on volume, urgency and staffing. Call the Laboratory prior to submitting large numbers of samples. Indicate specific tests required on submission forms.

SEROLOGY

	TEST	LAG-TIME DAYS
Anaplasmosis - cELISA	Th	1-8
Avian Influenza - AGID	M - Th	2-8
Bluetongue - cELISA	W	1-7
Bovine Leukemia Virus - ELISA	M	1-2
Bovine Respiratory Syncytial Virus - SN	Tu	7
Bovine Virus Diarrhea - ELISA	M	1-2
Bovine Virus Diarrhea - SN	W	5-7
<i>Brucella abortus</i> - BAPA, card, RIV, SPT, FP	M - F	1-8
<i>Brucella abortus</i> - STT	M & W	2-8
<i>Brucella abortus</i> - CF	W	1-8
<i>Brucella canis</i> - card	M - F	1
<i>Brucella ovis</i> - ELISA	M	2-8
EIA - AGID (received by 2:00 PM)	M - F	1-2
EIA - ELISA (received by 2:00 PM)	M - F	up to 1-day
Epizootic Hemorrhagic Disease - AGID	W	2-8
Feline Infectious Peritonitis (received by 3:00 PM)	M - F	1-2
Feline Leukemia Virus (received by 3:00 PM)	M - F	1-2
Feline Leukemia Virus/Feline Immuno-deficiency Virus (received by 3:00 PM)	M - F	1-2
Immunoglobulin levels (bovine & equine)	M - F	2
Infectious Bovine Rhinotracheitis - SN	F	3-5
Johne's (Paratuberculosis) - AGID	M - Th	2-8
Johne's (Paratuberculosis) - ELISA	W	1-8
Leptospirosis (8 serovars) - MAT	Th	1-2
Ovine Progressive Pneumonia/Caprine Arthritis Encephalitis - AGID	M-Th	2-8
Parainfluenza-3 - HI	Th	2-7
Pseudorabies Virus - Latex Aggl.	W	2
Pseudorabies Virus - SN	Th	2-5
<i>Salmonella pullorum</i> - MAT	M - Th	2-8
Vesicular Stomatitis (Indiana & New Jersey) - SN	Tu	2-3
West Nile Virus - IgM ELISA (June - October)	M, W	2-3

TIME REQUIRED FOR LABORATORY PROCEDURES

The following time schedule is a guideline for routine testing and can vary due to workload. LAG TIME IS WORKING DAYS.

AREA	TEST	TEST DAYS	LAG-TIME (DAYS)
BACTERIOLOGY	<i>Campylobacter</i> culture	M-F	5
	<i>Chlamydia</i> stain/ELISA	M-F	1-2
	<i>Clostridium</i> FA	M-F	1-2
	<i>Cryptosporidium</i> smear	M-F	1-2
	Culture and sensitivity, routine	M-F	2-5
	<i>Dirofilaria immitis</i> (heartworm) ELISA	M-F	1-2
	Fungal culture	M-F	10-30
	<i>Giardia</i> examination	M-F	1-2
	Parasite ID, fecal flotation	M-F	1-2
	Trichomonas culture	M-F	5
CLINICAL PATHOLOGY	CBC	M-F	same day if received by 3:00 PM
	Clinical chemistries	M-F	
PATHOLOGY	Histopathology	M-F	2-5
	Postmortem examination/gross only/complete	M-F	1-up to 14 days
VIROLOGY	Electron microscopy	Tu, Th	2-3
	Fluorescent antibody tests	Tu	1
	Rabies, FA	M - F	1
	Virus isolation	Th	21
